### INSTALLATION GUIDE

**APPLICATION**
- Chevy Tahoe / GMC Yukon / Cadillac Escalade *: 2007 - 2014, 75125-01A
- Chevy Suburban / GMC Yukon XL / Escalade ESV: 2007 - 2014, 75125-01A
- Chevy Avalanche / Escalade EXT: 2007 - 2014, 75125-01A

*Modification required to running board assembly. See Item 1 on page 2.

### TOOLS REQUIRED
- Safety goggles
- Measuring tape
- Flat blade screwdriver
- Phillips head screwdriver
- Right angle drill
- 9/32" drill bit
- 13 mm socket
- 10 mm socket
- 7 mm socket
- Ratchet wrench and extension
- 13mm end wrench
- Wire stripper / cutter
- Pliers
- Corrosion inhibitor
- 3/16" hex key wrench (allen wrench)
- 5mm hex key wrench (allen wrench)
- Electrical tape
- Weather proof caulking (silicone sealer)

### INSTALLATION TIME
3-5 Hours
Professional installation recommended

### SKILL LEVEL
1 2 3 4
4= Experienced

### WARRANTY
5-Year Limited Warranty

CAUTION
- Handle the motor and linkage assemblies with care when installing. Dropping can damage motor.
- Remove fuse from wiring harness during installation. Failure to do so could result in severe electrical shock.

AMP RESEARCH TECH SUPPORT 1-888-983-2204 (Press 2) Monday - Friday, 6:00 AM - 5:00 PM PST
Bolt idler linkage assembly to rearmost mounting tab using an M8 nut and washer (some vehicles may require a M8 x 35 bolt) and a M8x16 Button Head Screw. Finger tighten button head screw (14). Install fastener (12), finger tighten only. Next tighten fastener (14) to 16 ft-lbs. (22N m). Install threaded clamping plate (13) on top of pinch weld and thread fastener (10) into clamping plate and finger tighten. Install fastener (12), finger tighten only. Next tighten fastener (14) to 16 ft-lbs. (22N m).

Bolt driving linkage assembly to forward most mounting tab using an M8 nut and washer (some vehicles may require a M8 x 35 bolt) and a M8x16 Button Head Screw.

Slide mounting T-nut into position. Mount board and tighten fasteners to 10 ft-lbs. Align the end of the board with the rear edge of the back door.

Tighten button head fasteners and M8 nuts on driving and idler linkages to 16 ft-lbs.

Using the two 11” cable ties, mount controller to support arm next to battery.

Plug in wire harness. (Ensure that locking tabs engage.)

On some vehicles the emergency cable bracket may come in contact with linkage arm. If so, wrap supplied rubber around bracket and secure with two cable ties.

Remove power fuse. Attach power lead (RED wire) to positive pole on the battery. **CAUTION:** Do not ground wrench when engaged with nut.

Attach ground lead to negative battery pole.
Route long end of wire harness above engine and
down through drivers side wheel well. Zip tie
harness to cowling clips on fire wall. Route short
end down passengers side.

Route wire harness along the frame. Secure with
zip ties.

Secure with zip ties.

Poke hole through rubber grommet near front door
on underside of floor panel with small phillips
screwdriver. Push both wires through hole.
(See Step 11 for passenger side notes.)

Pop off the threshold cover with screwdriver and
remove the kick panel. The panel will slide out
from under the seat after fasteners give way.

Plug wire harness into motors.

Pop off the threshold cover with screwdriver and
remove the kick panel. The panel will slide out
from under the seat after fasteners give way.

Poke hole through rubber grommet near front door
on underside of floor panel with small phillips
screwdriver. Push both wires through hole.
(See Step 11 for passenger side notes.)

Plug wire harness into motors.

Plug wire harness into motors.

Pull up the carpet and thread both wires through the
floor panel (same steps on passenger side EXCEPT
drill 9/32” hole in metal and add rubber grommet).

Locate wire loom in door sill. Carefully remove wire
wrap and find the trigger wire.

Drivers side: LIGHT BLUE wire with BLACK
STRIPE

Passenger side: GREEN wire with BLACK
STRIPE. (Locate wire rearward of junction shown in
step 13)

Seal holes with silicon glue.

Driver side shown
Using Supplied Posi-Tap™ connector, splice shorter trigger wire into wire found in Step12.

Remove plastic trim on door near mirror attachment.

Carefully pry up window/door lock switch plate

Remove all plugs from switchplate

To remove door panel, first pry off door lock and plastic covers by handle and door latch. Remove the 3 door bolts and then remove door panel by prying loose all panel fasteners. Repeat on passenger side.

Remove door latch cable from door panel.
Repeat on passenger side.
Pull back the door weather guard, unbolt speaker and unplug. Thread plastic tube through accordion. **Repeat on passenger side.**

Feed longer wire of Step 11 through tube into door and pull out plastic tube on door side. Route wire along harness to switchplate.

Locate the brown plug and using supplied Posi-Tap™ connector, splice into trigger wire.

**2007-2008 Vehicles:**
Drivers side: TAN wire- pin #11
Passengers side: LIGHT GREEN wire-pin#11

**2009 & up Vehicles:**
Drivers side: Gry/Blk wire- pin #13
Passenger side: Tan/Wht wire- pin # 13

Insert plug from wire harness onto motor.

Slide rubber grommet on wire harness into slot of motor cover. Insert motor cover onto motor.

Insert plastic push pin rivets in mounting holes of motor cover. Use pliers to ease installation.
Slide motor assembly onto drive shaft and mounting bosses of driving linkage assembly. Use two (10) bolts to bolt motor down. Tighten to 16ft-lbs. Use electrical tape to cover any exposed wire from the motor.

On each side of the vehicle measure from the front edge of door line on the pinch weld to the specified lengths below. Measure at 20” for front LED Light and 58” for rear LED Light.

Affix lamp to rocker panel surface. Make sure the lamp is affixed to a clean, flat surface. There is a step down midway across the surface. Affix lamp just outside of step down.

Using supplied butt connectors, connect the lamp wires. Red to Red, Black to Black. Once Crimped use heat gun to shrink tube.

Close and wrap with conduit and electrical tape. Secure all loose wires with cable ties, with lamp wires pulled upward to avoid any wire snagging.

Reinstall fuse.
Check that all doors activate the Power Step and the LED Lights work when doors open and close. Reinstall any remaining trim panels.

FINAL SYSTEM CHECK
Check that all doors activate the PowerStep and the LED lights work when doors open and close.

NORMAL OPERATION: When the doors open, PowerStep automatically deploys from under the vehicle. When the doors are closed, PowerStep will automatically return to the stowed/retracted position. **Note that there is a 2-second delay before the PowerStep returns to the stowed/retracted position.**

CORRECT OPERATION OF LIGHTS: All four lamps will illuminate upon opening any door of vehicle. Lamps will stay on until restowing of both Power Steps or until 5 minutes has expired with the doors open. When the lights timeout after 5 minutes, they can be reilluminated by closing and opening any door of vehicle.
POWER-DEPLOYABLE RUNNING BOARDS OPERATION: AMP Research PowerStep running boards automatically move when the doors are opened to assist entering and exiting the vehicle.

**Automatic power deploy:**
The running boards will extend down and out when the doors are opened.

**Automatic power stow:**
The running boards will return to the stowed position when the doors are closed. There will be a 2-second delay before the running boards move to the stowed position.

**Automatic stop:**
If an object is in the way of the moving running board, the running board will automatically stop. To reset, clear any obstruction, then simply open and close the door to resume normal operation.

**Manually set in the deployed (OUT) position for access to the roof:**
The running boards can be manually set in the deployed position by firmly holding the step down with your foot while at the same time closing the door. To resume normal operation, open and close the door.

**Maintenance:** In adverse conditions, debris such as mud, dirt, and salt may become trapped in the running board mechanism, possibly leading to unwanted noise. If this occurs, manually set the running boards to the deployed position and flush the front and rear hinge arms with a high-pressure car wash wand. Avoid spraying the motors directly. After washing, apply silicone spray lubricant to the hinge pivot pins. Do not apply silicone, wax or protectants like Armor All® to the running board stepping surface.

**Caution!** Keep hands away when the running board is in motion.

---

**5-YEAR LIMITED WARRANTY**

AMP RESEARCH warrants this product to be free from defects in material and workmanship for FIVE (5) YEARS FROM DATE OF PURCHASE, provided there has been normal use and proper maintenance. This warranty applies to the original purchaser only. All remedies under this warranty are limited to the repair replacement of the product itself, or the repair or replacement of any component part thereof, found by the factory to be defective within the time period specified. The decision to repair or replace is wholly within the discretion of the manufacturer.

This warranty specifically excludes labor. If you have a warranty claim, first you must call our factory at the number below for instructions. You must retain proof of purchase and submit a copy with any items returned for warranty work. Upon completion of warranty work, if any, we will return the repaired or replaced item or items to you freight prepaid. Damage to our products caused by accidents, fire, vandalism, negligence, misinstallation, misuse, Acts of God, or by defective parts not manufactured by us, is not covered under this warranty.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE CREATED HEREBY ARE LIMITED IN DURATION TO THE SAME DURATION AND SCOPE AS THE EXPRESS WRITTEN WARRANTY. OUR COMPANY SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

**FOR WARRANTY ISSUES WITH THIS PRODUCT PLEASE CALL AMP RESEARCH CUSTOMER SERVICE 1-888-983-2204**
